

EUROPEAN
INNOVATION
NETWORK

Reconfigurable Assembly Technology

- Client: Harmonic drive manufacturer – SME
- Project: Flexible production concept based on the generic idea of 'specialised intelligent process units' ('expertons') integrated in cross-sectoral learning networks for a customised production.
- Project Value: €5.4M
- Project Type: Thematic Funding

Advanced RFID Technology

- Client: System Integrator – SME
- Project: Use of longer range RFID systems for warehouse operations – exploitable results in different business domains
- Project Value: €2.2M
- Project Type: non-Thematic Funding

Artificial Intelligence Technology

- Client: Crane Manufacturer – German SME
- Project: An innovative new way of operating cranes autonomously using Artificial Intelligence & advanced computer learning algorithms
- Project Value: €2.1M
- Project Type: non-Thematic Funding

Nanoimprinting Technology

- Client: Biotech start-up
- Project: Cost effective production of MIPs using selective recognition processes to be used in analytical science applications such as chromatography & capillary
- Project Value: €3.4M
- Project Type: non-Thematic Funding

Wireless Technology

- Client: Wireless Communications - LE
- Project: Application of novel methods of cryptography to form a new European standards in wireless communication devices and sensors.
- Project Value: €6.6M
- Project Type: Thematic Funding

Healthcare Technology

- Client: Healthcare & Electronics start-up
- Project: Use of a novel and innovative new bio-sensor for early detection of cancer cells
- Project Value: €2.4M
- Project Type: non-Thematic Funding

Wind Energy Technology

- Client: Wind turbine Manufacturer - LE
- Project: Integrated design and development of a more efficient wind turbine to be used at offshore applications
- Project Value: €6.9M
- Project Type: Thematic Funding

Advanced ICT Technology

- Client: Naval systems manufacturer – Danish SME
- Project: A novel & safe decision-support-system for Band A sea vessels
- Project Value: €2.8M
- Project Type: non-Thematic Funding

Sensor Technology

- Client: Defence Systems Manufacturer – SME
- Project: An integrated security systems for EU water supplies using sensor network technologies
- Project Value: €2.5M
- Project Type: non-Thematic Funding
